Changing *the way the* World Lives Outdoors

Trex added fencing to its portfolio in 2005.

FENCING *with* STYLE

THE CLASSIC VERTICAL LINES OF SECLUSIONS. THE CONTEMPORARY DESIGN OF HORIZONS.

Since 2005, Trex Fencing has been the composite fencing of choice throughout the United States and Canada, giving new owners peace of mind in knowing that their fence is not a part of the yard that will require constant attention. Whether Trex is used for HOA perimeters or internal fences or both, the community gains an immediate uplift and a long-term cost benefit from the elimination of annual painting, staining, or repairs.

TREX FENCING COLORS

Color Your World *with* Rich, Natural Hues *that* Complement *any* Landscape

Saddle weathers from a dark tan to light tan. It is popular on properties that emphasize earth tones or it is used to resemble a natural stain of a wood fence.

Winchester Grey weathers to a light grey and is popular in combination with a white or black accent. It can complement natural colors in brick or masonry and can be attractive when used in modern urban design.

Woodland Brown is the darkest Trex fencing color. It is a dark brown which fades the least from its new color. It is often popular as a contrast to lighter colors on the property.

The weathering process. As sunlight interacts with plastic, it will cause the surface to lighten. For its own product, Trex compensates for this natural phenomenon by over-pigmenting the material during production. This allows the composite to weather to a lighter value over a short period of time. This is a limited transition. Trex will retain color throughout its life.

WHY *choose* TREX FENCING?

STYLE

- » 3 rich, natural colors that complement any landscape
- » Neighbor-friendly, board-on-board design looks the same on both sides
- » Adaptable for slopes; heights up to 12 feet tall
- » Customizable for various applications (e.g., Trex posts with ornamental panels or lattice)

STRENGTH

- » Backed by the Trex 25-year residential and 10-year commercial warranties
- » Won't rot, split, splinter, or get damaged by insects
- » Resists warping
- » Withstands hurricane-force winds

SERENITY

- » Completely private interlocking pickets
- » Never needs painting or staining
- » Installs quickly and easily
- » Composed of 95% recycled materials

PRIVACY REDEFINED

Who says privacy fences need to look utilitarian? With Trex, form and function meet for a beautiful design that also protects your backyard spaces.

TREX FENCING ADVANTAGES

COMPARED TO WOOD

No painting or staining; resists insect damage and will not rot, warp, or splinter; more durable (longer life expectancy).

COMPARED TO VINYL

Non-reflective surface, more durable (longer life), richer colors, components are 2-4x thicker, eco-friendly.

COMPARED TO MASONRY

More natural-looking and less expensive, less impact on landscaping during installation

COMPARED TO OTHER COMPOSITES

Strongest material, internal wood post supports not required, neighbor-friendly design, proven brand
