The Source For
Trex® Fencing

ORIGINAL DESIGNER. PRODUCT EXPERT. OFFICIAL SUPPLIER

FENCE POSTS BY TREX. THE ULTIMATE UNIVERSAL FENCE POST.

Your fence is only as strong as your posts. Choosing the right material will make the difference between enjoying years of virtually no maintenance or wasting weekends with the headaches of fence repair.

Choosing a Trex fence post either for a Trex Fencing system or as an upgrade for wood and ornamental fencing is a smart choice.

BENEFITS OF A TREX FENCE POST

The versatility and durability of a Trex fence post is unmatched. With a 25-year from the leading brand in outdoor building, you can be assured that your fence posts were manufactured to last a generation or more.

Wood posts won't last; they split and rot. Vinyl posts are thin and have the unnatural temperance of plastic. With Trex, you get the best of both worlds.

Trex Fence Posts WILL:

- work with all types of fencing applications
- mount on top of walls or attach to them
- be compatible with virtually any fence product
- perform exceptionally well in high winds
- look natural in 3 rich colors
- enable installation of fences up to 12' tall
- help the environment with 95% recycled content

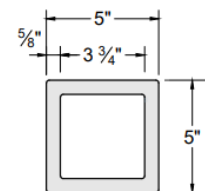

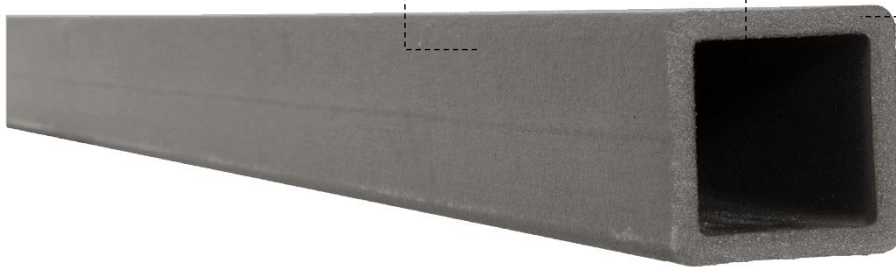

Trex Fence Posts WON'T:

- rot or decay
- warp or twist
- get damaged or eaten by insects
- become brittle, crack, or break in extreme temperatures
- need wood or steel reinforcements (except for gate hinge posts)

UNIVERSAL POST
same on all sides,
no routed holes

HOLLOW
standalone post can also
be used as a sleeve

THICK POST WALL
strong enough for
multiple applications

LENGTHS: 9', 12'

3 POST CAPS
Pyramid, Flat
Top, Crown

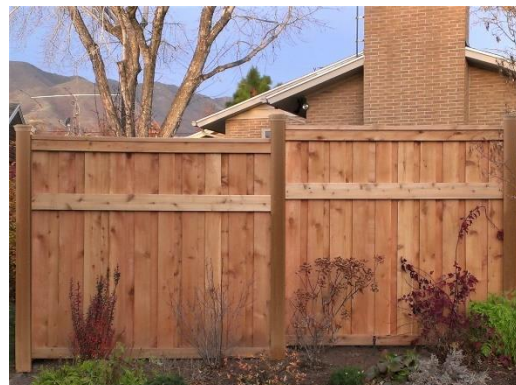

3 NATURAL COLORS
Colors weather to
lighter tints over a
season

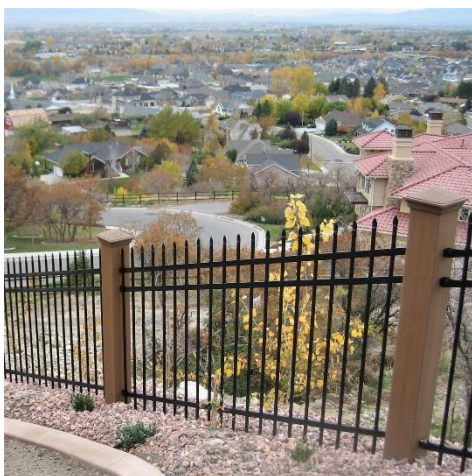

TREX COMPOSITE FENCE POSTS, NOT JUST FOR TREX FENCING

Many homeowners choose Trex posts to support other fence materials. **Ornamental fences**, such as steel, wrought iron or aluminum, look particularly striking when combined with Trex. The beefy 5" post gives the fence a more substantial look while the post color adds a beautiful contrast to the metal material.

On a more practical note, Trex posts are excellent alternatives to metal and wood simply because they won't rust or rot. Consider upgrading from a **wood fence post** to Trex. While your wood fence will degrade over time, with Trex posts, repair and replacement will be limited to just your rails and pickets. These are less expensive lumber components than posts, and they are less challenging to replace.

Upgrade your wood posts to Trex. If you plan to paint your fence, you can also paint your posts to match!

Integrate Trex fence posts with your ornamental panels for a corrosion-free, sturdy, colorful alternative. Attach virtually any panel to Trex posts with third-party flat mount brackets and exterior screws.

... and consider other applications. Trex fence posts can be used for community signposts, sleeves for structural needs (such as decks, awnings, privacy screens), rafters for shade structures, and more!
