

Trex® Fencing

vs. other products

UPGRADE YOUR LIFESTYLE

UPGRADE YOUR PROPERTY

UPGRADE to TREX

Trex combines the best of all products and improves on them.

The natural look of wood. The low-maintenance of vinyl. The durability of masonry. The stunning looks of a premium composite.

Upgrade to the leading fencing brand and relax luxuriously in your newly enhanced outdoor living space.

Why is TREX FENCING a better value *than* wood over time?

- Won't rot, warp or splinter
- Won't become food for termites
- Won't need seasonal painting, sealing or staining
- Has an industry-leading warranty

Trex Fencing vs. Comparable Wood Fence

Why WOOD you?

Invest in yourself and your property. Trex is the perfect picture frame for your outdoor living space. Take back your weekends and spend your money on something other than the maintenance of your fence.

With Trex, you will avoid

Why is TREX FENCING a superior choice to vinyl?

- Won't become brittle or crack
- Won't blow out in high winds
- Is 4x thicker and more durable
- Has the natural look of wood
- Is environmentally sustainable

Thin or thick?

Trex composite contains up to 400% more mass than vinyl, significantly increasing its strength and durability.

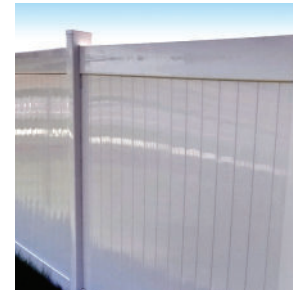

Look NATURAL

Beautify your yard with a picture-perfect fence.

Trex Fencing surrounds your outdoor living space with elegance, enhancing the look and feel of your property in a way that only natural tones and textures can.

With Trex, you will avoid

Why is TREX FENCING a superior choice to masonry?

- Has the natural look of wood
- Does not need painting or plastering
- Does not settle or crack
- Does not need invasive installation

Costly repairs

Masonry is prone to cracking when the ground settles. Repairing the wall often requires a complete rebuild.

Look NATURAL

Trex Fencing is a beautiful, natural complement to your outdoor living space.

With Trex, you have the benefit of strength and durability without the heavy, unnatural look of a wall.

With Trex, you will avoid

Why is TREX FENCING a superior choice to other composites?

- Interlocking pickets prevent gaps and warping
- Does not need inserts or supports
- Is a full composite system
- Has a high wind load capacity on 8' centers

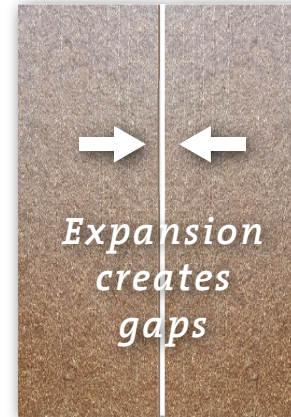

True Privacy

The Trex interlocking picket system eliminates gaps. Other products use butted or tongue & groove boards, which reduces privacy and destabilizes the fence as the material expands and contracts.

The ORIGINAL is still the BEST

Whether it's the longevity of the Trex composite formula or the unique design of the product, you can count on Trex.

Proudly made in the United States with green materials and manufacturing. Designed for incredible performance and longevity.
